# Add-on Installation

Hints for Safari Users

Installation

You can download to your Dynamics 365 only Zip archives of add-ons.
Usually, all archives get automatically decompressed after downloading by default.

Before proceeding with add-on download, check and change your Safari preferences if required.
First, hover on the top menu bar and click on **Safari** from browser.

Choose **Preferences...** (You can also open preferences with hotkeys ex.: command + ,).
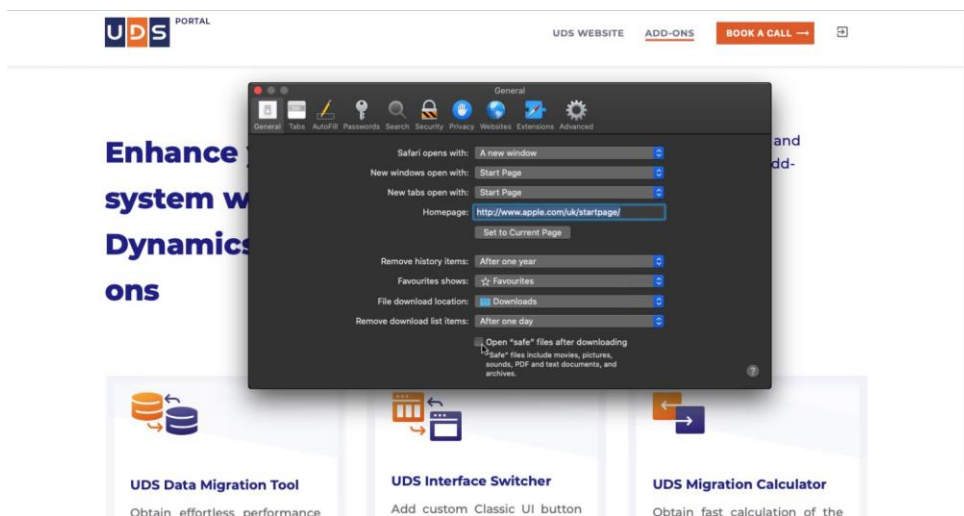

In the very bottom of the section General there is the following notification:

Open "safe" files after downloading
"Safe" files include movies, pictures, sounds, PDF and text documents, and archives.

To enable further downloading of Zip archives without automatic decompression, please **uncheck**.

Now you can safely download add-on's archive and upload it right to your Dynamics 365.
